Kathmandu, Nepal • +977-9861000341 • nirjala@example.com • github.com/neerjala5

PROFESSIONAL OBJECTIVE

Motivated B.Sc. CSIT student with practical hands-on project experience in multimedia computing, systems infrastructure, and frontend UI design. Adept at leveraging modern engineering tools and AI-assisted workflows to design system layouts, deploy code, and configure local environments. Seeking an entry-level IT Internship or Junior Developer role to build enterprise-scale solutions.

TECHNICAL SKILLS

Languages:	C, C++, Python, JavaScript
Web Development:	HTML5, CSS3, JavaScript (Frontend Web Architecture)
Systems & Ops:	Linux (Ubuntu Administration), Windows Subsystem for Linux (WSL), DNS Registry Setup
Tools & Frameworks:	MySQL, Draw.io (DFD Architectural Mapping), Git/GitHub, MS Office Suite

ACADEMIC & LAB PROJECTS

Multimedia Video Engine Sandbox [\[Python, OpenCV, Multimedia Lab\]](#)

- Designed and executed a customized framework wrapper for processing and playing frame assets in video streaming simulations.
- Applied generative AI diagnostics to debug frame buffer pipelines and accelerate codebase optimization.

JPEG Processing & Compression Simulator [\[Python, Pillow Image Library\]](#)

- Engineered an imaging script evaluating byte stream variation profiles against multi-tiered discrete block sizes.
- Documented file volume changes relative to pixel degradation limits to balance resolution retention with bandwidth constraints.

Software System Architectural Mapping [\[Draw.io, System Analysis\]](#)

- Constructed modular Data Flow Diagrams (DFDs) to blueprint entity connections, system access points, and processing paths.
- Translated logic concepts into structural wireframes used as schemas for development staging.

Personal Web Portfolio Engine [\[HTML5, CSS3, JavaScript\]](#)

- Architected a clean, high-contrast responsive interface template showcasing sandbox directories and academic code blocks.
- Implemented dynamic design parameters using precise styling layouts to verify multi-device frontend scaling.

EDUCATION

Bachelor of Science in Computer Science and Information Technology (B.Sc. CSIT)

Tribhuvan University Affiliate College, Kathmandu, Nepal
